**Key conclusions**

- Traffic volumes on the Princes Highway and 'the sandtrack' are currently similar.
- Traffic volumes are predicted to grow considerably with the majority of traffic predicted to use the upgraded Princes Highway.

**Traffic volumes are predicted to grow**

The existing traffic is along the existing highway.

Future traffic is along the upgraded highway (preferred option).

**Figures are based on annual average daily traffic travelling northbound and southbound, including through-traffic and local traffic. Source: RTA**
