The NSW Government is upgrading McMahons Point Wharf as part of the Transport Access Program. It is expected work will start in the first half of 2015 and take about five months to complete, weather and maritime conditions permitting.

Transport Access Program
The NSW Government is progressively upgrading ferry wharves across Sydney Harbour to improve Sydney’s ferry service for customers.

The wharf is being delivered as part of the NSW Government’s Transport Access Program – an initiative to deliver modern, safe and accessible transport infrastructure.

Community feedback
Communication about the McMahons Point Wharf upgrade started in May 2014. This included distribution of a community brochure, letters to key stakeholders, local advertising and a community information session.

In response to community feedback regarding the position of the new wharf, further assessments have been carried out to determine if there was a suitable alternative. A number of factors need to be considered including, safety, efficient ferry operations, accessibility, environmental and heritage impacts.
Talk to us

We now invite you to come along to a community information session where members of the project team will provide information about the proposed wharf position including artist’s impressions and respond to important feedback received during consultation.

McMahons Point Community Centre
165 Blues Point Road, McMahons Point
Thursday 12 February 2015
6.30pm-8pm

The presentation will start at 6.30pm followed by discussion. There will also be an opportunity to view information and speak to members of the project team one on one.

Customer benefits

- Better protection from the wind, rain and sun
- Improved safety for customers
- Improved access for mobility impaired customers and customers with prams
- Quicker and more efficient boarding and disembarking
- Future capacity for two ferries to berth at the wharf at the same time.
