McMahons Point Wharf and interchange upgrade
Early morning and night work

The NSW Government is upgrading McMahons Point Wharf as part of the Transport Access Program.

Construction of the new wharf started in April and we advised that some night and early morning work would be needed to install piles and to lift and place sections of the new wharf into place.

Up to 30 nights of work for pile installation will be carried out between Sunday 8 May and Friday 1 July 2016.

Piling installation requires calm water conditions, which usually occurs in the early hours of the morning when wind is low and there are fewer boats in the harbour.

Some piling work, including drilling and hammering of piles, can be noisy. Night work will take place between 11pm and 7am, conditions permitting.

Every effort will be made to minimise noise levels, with hammering work restricted to between 5am and 7am only during weekdays. Hammering will be intermittent, with one minute periods of hammering occurring five times per hour.

We thank you for your patience during this work and apologise for any inconvenience.

If you have any questions, please contact the wharf upgrade project team on 1800 770 973 or email WharfUpgradeProgram@rms.nsw.gov.au

Yours faithfully
