Western Harbour Tunnel and Beaches Link – ground water monitoring well installation from 25 September 2017

The NSW Government is funding preferred route investigations including geotechnical testing for the Western Harbour Tunnel and Beaches Link.

Roads and Maritime Services carries out ground water monitoring to gather information about underground conditions across a broad area. Data from this work will be used to inform the engineering design, final costings and a construction timeline.

A site on Wakehurst Parkway, Frenchs Forest, previously identified by our geologists for test drilling will become a ground water monitoring well and require installation. The site will be established within the area shown on the map over the page.

Work at this site will start from Monday 25 September 2017 and take around one night to complete, depending on ground conditions (weather permitting). When the installation work is complete, monthly checks will take place. When monitoring is complete, the site will be restored to its previous condition.

The work will take place at night between 6pm and 7am Monday to Friday. There will be no work on Sundays or on public holidays.

How will the work affect you?

Appropriate site controls will be in place including traffic controls if required. If traffic controls are required, please observe all signage and follow instructions of traffic controllers.

There may be some noise associated with this work. We will minimise disturbance to the local community and operate in an environmentally sensitive and sustainable manner.

The location of these tests does not indicate a possible alignment and the work is designed to gather data about rock strata and conditions deep below ground.

Contact

If you have any questions please contact our project team on 1800 789 297 during office hours (8.30am to 5pm Monday to Friday) or motorwaydevelopment@rms.nsw.gov.au.

Thank you for your patience during this important work.
