Community consultation report
MEMORIAL AVENUE UPGRADE, OLD WINDSOR ROAD TO WINDSOR ROAD
Community consultation Report
AUGUST 2014
**EXECUTIVE SUMMARY**

Roads and Maritime Services proposes to upgrade Memorial Avenue, between Old Windsor Road and Windsor Road, Kellyville.

This proposal would support the identified residential and commercial growth in the area and cater for significant forecast traffic increases. The NSW Long Term Transport Master Plan nominates the Memorial Avenue upgrade as a project to be implemented in the short-term.

**Project detail**

Roads and Maritime has developed a preliminary concept design to widen Memorial Avenue from a two lane road to a four lane divided road with a wide median, between Old Windsor Road and Windsor Road at Kellyville. The median would allow for a further upgrade to a six lane road when traffic increases in the future.

**What we consulted on**

Roads and Maritime displayed the preliminary concept design for community comment in December 2013 and January 2014.

**How we consulted**

The community was informed of the proposal and consulted on the project through a number of avenues, which included encouraging community and stakeholders to attend and provide their feedback at information sessions and via mail, email or phone to the project team.

**Community response**

Roads and Maritime received 54 submissions from the community and stakeholders. This feedback has been considered and will assist in the refinement of the concept design and the Review of Environmental Factors.

A number of respondents expressed support for the upgrade of Memorial Avenue, and there were a number of requests for the implementation of the project to be a priority because of increasing traffic in the area.

The importance of an integrated local road system was also a key community comment based on the development of the Balmoral Road land release area.

Other feedback received included general accessibility, bus facilities, construction, environment, traffic lights, safety and local traffic movements.

**Next steps**

Roads and Maritime will consider the community feedback when preparing the concept design and the Review of Environmental Factors. The next stage of consultation for community comment will be the exhibition of the refined design and the Review of Environmental Factors.
1.0 INTRODUCTION

The purpose of this report is to summarise the first stage of consultation on the proposed upgrade of Memorial Avenue between Old Windsor Road and Windsor Road, Kellyville. Roads and Maritime Services sought community comment on the preliminary concept design in December 2013.

The feedback received during this early stage will help refine the concept design and the Review of Environmental Factors. The next stage of consultation for community comment will be the exhibition of the refined design and the Review of Environmental Factors.

1.1 Background

Memorial Avenue is an arterial road connecting Old Windsor Road in the west with Windsor Road in the east. It is about 2.2 kilometres long, bisects the new Balmoral Road release area precinct and provides access to Blacktown, Glenwood, Stanhope Gardens, Parklea, Baulkham Hills, Castle Hill and Kellyville.

The area surrounding Memorial Avenue is identified as a residential and commercial growth area, and significant increases in traffic are forecast. The Hills Shire Council released a Structure Plan for Balmoral Road release area in 2012 which identified 410 hectares of mainly rural land surrounding the Memorial Avenue corridor for urban development.

The Structure Plan indicates that there would be 6000 new dwellings in the release area, housing about 13,000 people.

The NSW Long Term Transport Master Plan includes the proposal to upgrade Memorial Avenue and states it is a short-term priority.

1.2 The proposal

Roads and Maritime has developed a preliminary concept design to widen Memorial Avenue from a two lane road to a four lane divided road.

The location of this proposed upgrade, including the access arrangements along Memorial Avenue was illustrated in the December 2013 community update (Appendix A) and is shown in Figure 1 (page 5).

The key features include:

- Increasing from a two lane road to a four lane divided road with a central median
- Two new intersections with traffic lights at Arnold Avenue and the proposed Severn Vale Drive
- A posted vehicle speed limit of 70km/h
- A wide central median to allow for future road widening to six lanes
- Landscaping in the median
- Shared pedestrian/cyclist path on both sides of Memorial Avenue
- Bus priority capability at traffic lights and indented bus bays on both sides of Memorial Avenue
- Designated turning lanes and bicycle lanes at intersections with traffic lights.
Figure 1. Location map
2.0 CONSULTATION APPROACH

Roads and Maritime decided to consult at the early stage of design to gather a broad understanding of the suggestions and concerns community have for this road upgrade.

The preliminary plans were developed in collaboration with The Hills Shire Council and took into account the development of the Balmoral Road release area.

Public exhibition of the proposed design was between Tuesday 3 December 2013 and Friday 31 January 2014. Although the submission period closed on 31 January 2014, submissions were accepted until early March 2014.

The approach was to provide written and visual material describing the proposal.

2.1 Consultation objectives

Roads and Maritime carried out consultation during December 2013 on the preliminary concept design with an aim of:

• Seeking feedback from the community and stakeholders to inform the next stage of design and the Review of Environmental Factors
• Identifying any concerns that would need to be understood and addressed through detailed design
• Building a database of interested community members to engage with during the proposal’s ongoing development.

2.2 How we consulted

Community members were encouraged to provide their feedback at information sessions and to the project manager via mail, email or phone. The community and stakeholders were informed about the proposal and consultation through a number of avenues including:

• Roads and Maritime website update
• Newspaper advertisements
• Display posters set up at local venues
• Community update
• Community information sessions.
Roads and Maritime website
Roads and Maritime website was updated with information about the project in December 2013. This website provided all relevant information about the project, including:

- Location map
- A copy of the community update (December 2013)
- Contact details for all written correspondence
- Project team’s contact details
- Next stages of the project.

This website will continue to be updated to provide information to the community and stakeholders as the project progresses. This can be viewed at the following link www.rms.nsw.gov.au/roadprojects/projects/sydney_region and search for Memorial Avenue.

Newspaper advertisements
Roads and Maritime placed advertisements (Appendix B) in local newspapers including:

- Hills News, 3 December 2013
- Blacktown City Sun, 3 December 2013
- Rouse Hill Times, 4 December 2013.

The advertisement included information on the proposal and information sessions and invited written feedback.

Display posters
A display poster (Appendix C) invited members of the community to view the preliminary concept design from Tuesday 3 December 2013 until Friday 31 January 2014 at:

- The Hills Shire Council
- Castle Hill Library.

Community update
Roads and Maritime distributed about 25,000 copies of community update (Appendix A) in December 2013. Distribution areas (see Appendix D) included: Kellyville, Kellyville Ridge, Glenwood, Parklea, Stanhope Gardens, and parts of Acacia Gardens. The community update was also available on the Roads and Maritime website.

Community information sessions
Roads and Maritime held two community information sessions and about 30 people attended. People were able to view the design, ask questions and have discussions with the designers and project team. Comments received from these meetings are outlined in the next section, along with Roads and Maritime’s response.

Meetings were held on:

**Tuesday 10 December 2013**
Wrights Road Community Centre, Kellyville
About 20 people attended

**Thursday 12 December 2013**
Wrights Road Community Centre, Kellyville
About 10 people attended
3.0 CONSULTATION SUMMARY

3.1 Overview

Roads and Maritime received 54 written submissions. Of these five were from businesses or stakeholders with interest in the area and 49 from members of the community.

Overall there was support for the upgrade of Memorial Avenue with a number requesting that implementation of the project is a priority to cope with increasing traffic in the area.

There were a number of comments that Roads and Maritime will consider while refining the preliminary concept design. The key points included:

- Access along local roads and changes to these arrangements
- Access to facilities, including a retirement facility by emergency vehicles and buses
- Access to the Kellyville Memorial Park for use of the sportground
- Design of lanes and number of lanes in the short term, including feedback on the proposed median
- Environmental management including noise, air and flood mitigation as well as recognition of the area’s social heritage
- Traffic movements and safety of vehicles
- Location and number of traffic lights
- Shared path design
- Safety of pedestrians and cyclists
- Bus priority lanes
Table 1. Community and stakeholder feedback

<tr>
<th>Issue</th>
<th>Sub-issue</th>
<th>Summary of community/stakeholder comments received</th>
<th>Roads and Maritime’s comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Access</td>
<td>Kellyville Memorial Park access</td>
<td>Pedestrian access to the sportsground is required across Memorial Avenue.</td>
<td>Roads and Maritime confirms pedestrian traffic light crossings are proposed at the Severn Vale Drive intersection which is adjacent to Kellyville Memorial Park and this will provide access for pedestrians and cyclists.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Pedestrian bridge across Memorial Avenue linking Kellyville Memorial Park with the residential area in the north.</td>
<td>Roads and Maritime does not propose to build a pedestrian bridge across Memorial Avenue. However, the Balmoral Road release area Master Plan outlines a proposal to provide for a pedestrian over-bridge near Thomas Boulton Circuit.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Kellyville Park needs right in and right out access.</td>
<td>Memorial Avenue is an access controlled state arterial road. When the local road network is completed there will be alternate routes to access and exit Kellyville Memorial Park.</td>
</tr>
<tr>
<td>Local residents</td>
<td>Local resident access and use of this area needs to be prioritised over through traffic.</td>
<td></td>
<td>Memorial Avenue is an access controlled state arterial road and provides an important east-west link. Access to local residences will be provided via the intersections with traffic lights and the local road network. When the Memorial Avenue upgrade and the local precinct roads are fully developed, the current access issues will be addressed.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>The development of the local road network is being managed by The Hills Shire Council, which advises that all internal roads in the Balmoral Road release area precinct are expected to be completed within three years to five years.</td>
</tr>
<tr>
<td>Local road networks</td>
<td>Residents should be able to make right turns into or from access roads at the intersections with Memorial Avenue. There are barriers here already preventing this.</td>
<td></td>
<td>Memorial Avenue is a state arterial road with controlled access. Two signalised intersections with traffic lights are proposed to allow all movements at Arnold Avenue West and at Severn Vale Drive. Alternative access arrangements would be provided through the Balmoral Road release area precinct local road network.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>When the local precinct roads are fully developed, access issues will be addressed. The development of the local road network is being</td>

<tr>
<td>Issue</td>
<td>Sub-issue</td>
<td>Summary of community/stakeholder comments received</td>
<td>Roads and Maritime’s comments</td>
</tr>
<tr>
<td>-------</td>
<td>-----------</td>
<td>---------------------------------------------------</td>
<td>-----------------------------</td>
</tr>
<tr>
<td></td>
<td></td>
<td>managed by The Hills Shire Council, which advises that all internal roads in the Balmoral Road release area precinct are expected to be completed within three years to five years.</td>
<td></td>
</tr>
<tr>
<td>Troubled Traffic</td>
<td>Illegal right turns at these left in / left out accesses cause many accidents.</td>
<td>The design of the proposed road upgrade will include a wide median along Memorial Avenue and it is expected this will limit the ability of drivers to make illegal turns.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The current temporary left in / left out access to Memorial Avenue from Hartigan Avenue should be maintained until a permanent access arrangement is made available.</td>
<td>Memorial Avenue is an access controlled state arterial road. Right turns would only be allowed at intersections with traffic lights. Roads and Maritime confirms that the temporary access from Hartigan Avenue onto Memorial Avenue will be removed after the Memorial Avenue upgrade. When the local road network is completed, there will be alternate routes to avoid the need for right turns at other access points. Roads and Maritime would give due consideration to ensuring adequate alternate access is available before removing the temporary access.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Need for right in / right out access at Burns Road/Memorial Road intersection is needed.</td>
<td>As Burns Road is very close to the Windsor Road intersection, a four way intersection at Burns Road would not be effective. Alternate access arrangements will be provided through the Balmoral Road release area precinct local road network.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>A right in / right out access to Gracewood retirement facility is needed.</td>
<td>Memorial Avenue is a state arterial road with controlled access. Two intersections with traffic lights will allow movements at Arnold Avenue West and at Severn Vale Drive. Access at intersections without traffic lights will only be left in and left out. When the local precinct roads are fully developed access issues will be addressed. The development of the local road network is being managed by The Hills Shire Council, which advises that all internal roads in Balmoral Road release area precinct are expected to be completed within three years to five years.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Left in/left out access and a wide median strip would make it difficult for emergency vehicles to access housing estate. People making illegal right turn movements out of Hartigan Avenue stay on the wrong side of the road for quite some distance to clear the right of way.</td>
<td>Alternate access arrangements will be available through the Balmoral Road release area local road network.</td>
<td>The design of the proposed road upgrade will include a wide median along Memorial Avenue and it is expected this will limit the ability of drivers to make illegal turns.</td>
</tr>
<tr>
<td>Issue</td>
<td>Sub-issue</td>
<td>Summary of community/stakeholder comments received</td>

</tr>
<tr>
<td>-------</td>
<td>-----------</td>
<td>---------------------------------------------------</td>
<td>------------------------------</td>
</tr>
<tr>
<td></td>
<td></td>
<td>raised median which creates a dangerous situation for the traffic on Memorial Avenue.</td>
<td>When the local precinct roads are fully developed access issues will be solved. Alternate access arrangements will be provided through the Balmoral Road release area precinct local road network.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Severn Vale Road benefits all the Balmoral Road area north of Memorial Ave. The Hills Shire Council seeks dedication of land and construction of this collector/distributor road without compensation. The developers of the Arnold Avenue lands should not be required to meet at their expense, the solving of the traffic problems for this area.</td>
<td>Roads and Maritime is responsible for the Memorial Avenue upgrade. Any matters relating to the local road network or the Balmoral Road release area precinct Master Plan should be addressed to Council. This comment will be forwarded to Council.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>When temporary access to Gorman Avenue is closed, local road network to access Severn Vale Drive needs to be completed.</td>
<td>It is expected that precinct development and the Memorial Avenue upgrade would be carried out around the same time. However temporary access to Gorman Avenue will not be closed until alternate access via internal roads is completed.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Until all the works are completed are residents of Gormon Avenue who wish to travel south to Sunnyholt Road expected to go via Windsor Road, Samantha Riley Drive and then Old Windsor Road?</td>
<td>Approval conditions to residential development in the Gormon Avenue area, specifies that only a temporary left in / left out access would be allowed to Memorial Avenue. Alternate access arrangements will be provided through the Balmoral Road release area local road network. Council advises that all internal roads in Balmoral Road release area precinct are expected to be completed within three years to five years.</td>
</tr>
<tr>
<td></td>
<td>Pedestrian/cyclists</td>
<td>A pedestrian overbridge across Memorial Ave linking bus stops, residential areas and the Kellyville Village shopping centre should be provided.</td>
<td>Roads and Maritime proposes pedestrian traffic light crossings be provided at the Severn Vale Drive intersection with Memorial Avenue which will provide access for pedestrians and cyclists. The Balmoral Road release area Master Plan outlines a proposal for a pedestrian over-bridge near Thomas Boulton Circuit as part of the precinct development.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>The Hills Shire Council LEP shows a cycleway in Burns Road that stops to either side of Memorial Avenue with no connection through.</td>
<td>Cyclists would be able to cross Memorial Avenue via the traffic lights at the intersection of Memorial Avenue/ Severn Vale Drive.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Support separated cycleway facilities along</td>
<td>Noted.</td>

<td>-----------------------------------------------------------------------------------------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Communication</td>
<td>Community information sessions</td>
<td>There was no adequate notice about the community information days. Need prompt and better communications with the Kellyville community about this upgrade.</td>
<td>Roads and Maritime provided communication about the community information sessions via: a web page update on the Roads and Maritime website and newspaper advertisements in the Rouse Hill Times and Hills News. Roads and Maritime distributed 25,000 copies of the community update to residences and businesses the local area. Roads and Maritime would also provide direct email advice of future consultation activities to those who have opted to receive such notification.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Aerial photograph used in the map is old.</td>
<td>Roads and Maritime obtains aerial maps under license for design purposes. These maps are usually updated every five years so they may not show the latest developments. Roads and Maritime would obtain latest available aerial map for drawing the concept plans.</td>
</tr>
<tr>
<td>Design</td>
<td>Bus facilities</td>
<td>Clarity required about bus priority signals and about the dedicated bus lanes at traffic lights.</td>
<td>Roads and Maritime is proposing dedicated bus priority lanes at traffic lights. These jump start lanes would prioritise bus movements at the traffic lights on Memorial Avenue. Roads and Maritime is not proposing to build a dedicated bus lane as part of this proposal.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Do not support the indented bus-bays. If indented bus bays remain a feature of the design, then consideration should be given to incorporating long tapers at the egress from the bays to allow the bus to accelerate to a higher speed prior to merging into passing traffic.</td>
<td>When considering indented bus bays along Memorial Avenue, Roads and Maritime will assess vehicle and pedestrian safety and the need for free flowing traffic in accordance with the road design guide.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>A stakeholder noted they were willing to develop the required bus shelter adjacent to 34-36 Memorial Avenue.</td>
<td>Roads and Maritime welcomes the offer to contribute to the construction of the bus shelter. The detailed design for the upgrade will resolve the location and the type of bus shelter to be provided. Roads and Maritime will contact this stakeholder prior to detailed design.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Busways wants Public Transport Information and Priority System (PTIPS) to be used for this</td>
<td>Bus jump start lanes are being considered at the intersections with traffic lights. Roads and Maritime will carry out further consultation.</td>
</tr>
<tr>
<td>Issue</td>
<td>Sub-issue</td>
<td>Summary of community/stakeholder comments received</td>
<td>Roads and Maritime’s comments</td>
</tr>
<tr>
<td>-------</td>
<td>-----------</td>
<td>---------------------------------------------------</td>
<td>--------------------------------</td>
</tr>
<tr>
<td></td>
<td>Intersections</td>
<td>development, including bus jump start pockets at intersections with traffic lights.</td>
<td>with bus operators and Transport for NSW (TfNSW) to determine the best layouts for intersections, so buses can meet their service requirements along Memorial Avenue. PTIPS will be considered during detailed design.</td>
</tr>
<tr>
<td></td>
<td>Intersections</td>
<td>Need either traffic lights or roundabouts at local intersections along Memorial Avenue.</td>
<td>Intersections with traffic lights are proposed at Arnold Avenue West and at Severn Vale Drive. These intersections would provide for all turning movements.</td>
</tr>
<tr>
<td></td>
<td>Intersections</td>
<td>Need a four-way intersection at Arnold Avenue to cater for the vehicles accessing this street. It is increasingly difficult to make right turns from Arnold Avenue.</td>
<td>New intersections with traffic lights are proposed at Arnold Avenue West and at Severn Vale Drive. These intersections would provide for all turning movements.</td>
</tr>
<tr>
<td></td>
<td>Intersections</td>
<td>Providing traffic lights at the intersection of Arnold Avenue and widening of Memorial Avenue is long overdue.</td>
<td>Noted. As part of this proposal, new intersections with traffic lights are proposed at Arnold Avenue West and at Severn Vale Drive. These intersections would provide for all turning movements.</td>
</tr>
<tr>
<td></td>
<td>Intersections</td>
<td>The proposed intersections with traffic lights could be replaced with roundabouts.</td>
<td>Roundabouts require more land and would operate well only when the traffic demands on all approach roads are even. Intersections with traffic lights are required to meet the uneven traffic demands on the adjoining roads. These intersections would provide for all turning movements.</td>
</tr>
<tr>
<td></td>
<td>Intersections</td>
<td>Widening Memorial Avenue would not solve congestion without upgrading the intersections at Old Windsor Road and Windsor Road.</td>
<td>Planning for the Memorial Avenue upgrade will investigate improvements to the intersections of Memorial Avenue with both Old Windsor Road and Windsor Road.</td>
</tr>
<tr>
<td></td>
<td>Intersections</td>
<td>When will these intersections be upgraded?</td>
<td>Roads and Maritime is currently investigating some improvements to Old Windsor Road/Memorial Avenue intersection as an interim solution to help reduce congestion.</td>
</tr>
<tr>
<td></td>
<td>Intersections</td>
<td>Grade separation needed at the intersections with Old Windsor Road and Windsor Road.</td>
<td>Roads and Maritime will identify the most appropriate layouts for the intersections at Old Windsor Road and at Windsor Road based on traffic modelling.</td>
</tr>
<tr>
<td></td>
<td>Intersections</td>
<td>Memorial Avenue/Burns Road intersection should be either a signalised four-way intersection or roundabout to allow for both</td>
<td>Memorial Avenue is a state arterial road with controlled access. Two intersections with traffic lights will be provided at Arnold Avenue West and at Severn Vale Drive.</td>
</tr>
<tr>
<td>Issue</td>
<td>Sub-issue</td>
<td>Summary of community/stakeholder comments received</td>
<td>Roads and Maritime’s comments</td>
</tr>
<tr>
<td>------------</td>

<td>---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Right in and right out also.</td>
<td>As Burns Road is very close to the Windsor Road intersection a four-way intersection at Burns Road would not be effective. Alternate access arrangements are proposed through the Balmoral Road release area precinct local road network. When the local precinct roads are fully developed access issues will be addressed. The development of the local road network is being managed by The Hills Shire Council, which advises that all internal roads in the Balmoral Road release area precinct are expected to be completed within three years to five years.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Right turn bay length on Windsor Road for turning into Memorial Avenue is currently inadequate and the traffic consistently banks back beyond the turn bay. Double right turning lanes are needed.</td>
<td>Noted. Roads and Maritime will identify the most appropriate layouts for the intersections at Old Windsor Road and at Windsor Road based on traffic modelling analysis.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Need for a sufficient long left turn bay facility on Windsor Road approaching Memorial Avenue from the Castle Hill direction. Consideration needs to be given when making the turn into Memorial Avenue a “left turn with care after stopping” sign.</td>
<td>Roads and Maritime will identify the most appropriate layouts for the intersections at Old Windsor Road and Windsor Road based on traffic modelling analysis.</td>
</tr>
<tr>
<td>Median strips</td>
<td></td>
<td>Do not waste space by providing wide medians.</td>
<td>Roads and Maritime has proposed the median along Memorial Avenue for road safety as well as future development of the road to six lanes (taking the two additional lanes from the median) when traffic volumes require this.</td>
</tr>
<tr>
<td>Number of lanes</td>
<td></td>
<td>The upgrade should provide two lanes each way for cars.</td>
<td>Roads and Maritime confirms the upgrade would provide two lanes in each direction. Kerb side lanes are not proposed to be restricted to buses only.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Private cars need two lanes each way. If there is a need for bus only lanes then six lanes should be built now. Build the ultimate</td>
<td>Roads and Maritime has reviewed the projected traffic volume, and demand does not require a six lane road in the short to medium term. The road upgrade will be designed to ensure the additional</td>
</tr>
<tr>
<td>Issue</td>
<td>Sub-issue</td>
<td>Summary of community/stakeholder comments received</td>
<td>Roads and Maritime’s comments</td>
</tr>
<tr>
<td>---------------</td>
<td>--------------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------</td>
<td>---------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td></td>
<td></td>
<td>additional lanes now. It is cheaper to build it all now. If only two lanes are provided each way, someone parking on</td>
<td>lanes can be added easily in the future. Parking would not be permitted along Memorial</td>
</tr>
<tr>
<td></td>
<td></td>
<td>the road side would invariably defeat the purpose of two lanes for the free flow of traffic.</td>
<td>Avenue as it is an access controlled state arterial road.</td>
</tr>
<tr>
<td></td>
<td>Shared path</td>
<td>The upgrading should provide adequate shared paths for pedestrian and cyclists on both sides of the road.</td>
<td>Roads and Maritime confirms this proposed upgrade is to provide shared paths on both sides of Memorial Avenue.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Will there be separation between Thomas Boulton Circuit and shared path on Memorial Avenue?</td>
<td>Roads and Maritime confirms there would be a strip of land that would separate Thomas Boulton Circuit and the shared path on Memorial Avenue.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Off-road shared paths should have dedicated space for both pedestrian and cyclists. A good example is the Epping</td>
<td>Roads and Maritime confirms the shared path concept was developed to make best use of the available space within the corridor. Design standards specify the width needed for shared paths. Along Memorial Avenue the width of the shared paths would meet Roads and Maritime standards.</td>
</tr>
<tr>
<td>Environment</td>
<td>Air pollution</td>
<td>Resident raised concern about air pollution.</td>
<td>Roads and Maritime notes air pollution impacts will be considered during the environmental impact assessment for this project.</td>
</tr>
<tr>
<td></td>
<td>Heritage</td>
<td>Memorial Avenue should reflect the heritage value it was named after.</td>
<td>Roads and Maritime will conduct a heritage assessment as part of the environmental impact assessment and consider how to best reflect these values in the urban design.</td>
</tr>
<tr>
<td></td>
<td>Noise</td>
<td>Noise barriers need to be erected on both sides of the road along Memorial Avenue. Is this planned?</td>
<td>New development approvals within the precinct require the developers to provide noise mitigation. If there are existing buildings potentially affected by road traffic noise from this upgrade this would be assessed in the environmental impact assessment. Any treatment would then be considered in accordance with Roads and Maritime policy on road traffic noise mitigation.</td>
</tr>
<tr>
<td></td>
<td>Potential flooding</td>
<td>Memorial Avenue is susceptible to flooding in the low lying sections.</td>
<td>Roads and Maritime confirms flood modelling is being carried out as part of designing the upgrade to establish the new road level. Information will be available for community comment on the environmental impact assessment of the project.</td>
</tr>
<tr>
<td></td>
<td>Construction</td>
<td>The road works need to be constructed in</td>
<td>Impacts and potential disruptions during the construction phase will</td>
</tr>

| Question: There is a new development along Burns Road, yet no right turn into Burns Road from Memorial Avenue is being provided. Is this the only access to make a U-turn into Arnold Avenue? | Response: Memorial Avenue is a state arterial road with controlled access. Two intersections with traffic lights will be provided at Arnold Avenue West and at Severn Vale Drive. As Burns Road is very close to the Windsor Road intersection, a four-way intersection at Burns Road would not be effective. Alternate access arrangements will be provided through the Balmoral Road release area precinct local road network. |

| Question: What is happening at the Memorial Avenue and Windsor Road intersection? | Response: Roads and Maritime will identify the most appropriate layout for the intersections at Old Windsor Road and at Windsor Road based on traffic modelling analysis. |

| Question: Why is there a lot of traffic congestion in this area, for example, Showground Road and Memorial Avenue? | Response: Roads and Maritime notes that the area is busier due to the development occurring in the area, particularly within the Balmoral Road release area. |
4.0 NEXT STEPS

Roads and Maritime considered all written and verbal comments received following the display of the proposed preliminary concept design of the proposed upgrade of Memorial Avenue between Old Windsor Road to Windsor Road, Kellyville. These comments will assist with the refinement of the concept design.

A Review of Environmental Factors is currently being prepared and will be displayed for community comment. A refined concept design will be placed on display at the same time. Members of the community will be invited to provide feedback on both the Review of Environmental Factors and the refined concept design targeted for late 2014.

APPENDIX A - Community update (December 2013)

Memorial Avenue upgrade
Old Windsor Road to Windsor Road
Have your say

Roads and Maritime Services is planning for the upgrade of Memorial Avenue to meet the future transport needs of Sydney's north west.

The project team has developed a preliminary concept design to widen Memorial Avenue from a two lane road to a two lane divided road between Old Windsor Road and Windsor Road in Ryde. The preliminary concept design is on display for continued comment until Friday 31 January 2014.

Background

Memorial Avenue is an arterial road connecting Old Windsor Road to the west. It is about 22 kilometres long, serving the new Eastern Riverina and a industrial area north-west and provides access to Glenbrook, Glenmore, Olympian Crescent, Halsey, Northwood and Ryde.

There will be an increase in traffic growth due to increased population and commercial development in the area. The City of Ryde Council prepared a Structure Plan for Eastern Road revegetation in 2012 which identified it as a feature of many road land and surrounding the Memorial Avenue corridor for urban development.

The structure plan identified that there would be a total of 64,000 people in the area, for about 20,000 people.

The N:ZM Transport Master Plan includes the proposal to upgrade Memorial Avenue and includes land to be improved in the corridors. The upgrade of Memorial Avenue would support the development of the Memorial Avenue corridor for urban development.

The MAP has improved access arrangements along Memorial Avenue between Old Windsor Road and Windsor Road in Ryde.

Have your say –

Use this website for more details.

Benefits

- Increased capacity to cater for traffic growth
- Improved safety for pedestrians through the introduction of middle pedestrian plazas allowing for more pedestrian safety in appropriate areas
- Improved safety for cyclists and pedestrians by introducing pedestrian crossings
- Improved cycling and pedestrian access and facilities
- Improved safety for vehicles and pedestrians by providing for pedestrian and cycle routes
- Improved pedestrian and cycle routes between residential and commercial areas
- Improved access and movement for traffic
- New bus priority at selected locations
- Improved access to Slade Road
- Improved landscaping

Access arrangements and features of the proposed road upgrade

The features of the proposed road upgrade of Memorial Avenue between Old Windsor Road and Windsor Road in Ryde is shown in the next map.

Dear Mr King

RE: Consultation regarding proposed Memorial Ave Upgrade between Old Windsor Road and Windsor Road, Kellyville

13 November 2014 Roads and Maritime Services (RMS) is proposing to undertake works for the Memorial Ave upgrade between Old Windsor Road and Windsor Road, Kellyville.

Under the State Environmental Planning Policy (Infrastructure) 2007, Roads and Maritime Services is required to consult with Hills Shire Council under clauses 13 and 15 due to the potential impacts on Council infrastructure and flood liable lands.

The proposal would widen the existing two-lane two-way road to a four lane, dual carriageway road with future provision for six lanes, within a 40 metre wide road reservation.

The proposed works include:

- Upgrade of the Arnold Avenue (west) intersection to a signalised four-way intersection
- Construction of a new intersection with Memorial Avenue at Severn Vale Drive and realignment of Arnold Avenue (east) about 100 metres east of current alignment
- Closure of three intersections with Memorial Avenue at Hector Court, Rutherford Avenue and Arnold Avenue (east) by others
- Upgrade of and alterations to the existing intersections with Windsor Road, Old Windsor Road
- A left-in, left-out intersection at Burns Road and Stone Mason Drive
- Provision of a kerb and gutter for the full length of Memorial Avenue
- Provision of shared paths within the verge on both sides of Memorial Avenue
- Provision of bus priority capability at traffic lights and indented bus bays on both sides of Memorial Avenue to allow buses a head start in the east–west direction
- Replacement of the pipe culvert with a bridge over Strangers Creek (this would be an 18-metre span concrete plank bridge with vertical abutments)
A Review of Environmental Factors (REF) document is being prepared to consider and assess any actions that have the potential to impact upon the environment as a result of the proposed upgrade.

A map outlining the extent of the project is attached to this letter.

It would be appreciated if you could provide any comments regarding this proposal by 10 November 2014.

The RMS would be pleased to provide further information if required. In this regard Siva Satchi may be contacted on (02) 8849 2019 or by email Siva.SATCHI@rms.nsw.gov.au.

Yours sincerely
