Road surface assessment, from Monday 6 August

The NSW Government is building a new Windsor Bridge to provide a safe and reliable crossing of the Hawkesbury River at Windsor.

Roads and Maritime Services has engaged Georgiou Group to construct the new bridge and road work for the Windsor Bridge replacement project.

As part of the early work for the bridge replacement, we will be assessing the road surface conditions along George Street, Baker Street, The Terrace, Court Street, Arndell Street and Freemans Reach Road.

This will involve trucks driving slowly down these streets. There should be minimal noise from these trucks, and they will be switching off any alarms or reverse beepers.

Our work schedule

For the safety of other road uses and to reduce the impact to the road network, this work will be done at night. This work will take up to three nights, however it is likely that each of these streets will only be visited once. Our work hours will be between 8pm and 5am between Monday 6 August and Friday 10 August.

If additional work is required, the community will be informed in a separate notification with specific details of the work and its expected impact.

How will the work affect you?

There will be trucks driving slowly down the streets during the night. Typically the trucks will only make one pass of each street and there should be minimal noise from this work. Trucks will switch off alarms and reverse beepers to minimise any noise further. The trucks will complete their work in residential streets before 12am (midnight).

Traffic changes

There will be no temporary traffic changes required during this work.
Location map

The following map illustrates the location of the work.
